I am a full stack web, mobile app, video game, and desktop application developer with some background in animation. I am looking for full time permanent remote work and I am here to make something awesome.

Work:

Senior Web Developer (Remote)

Sep 2015 - Present

The Minery, London ON

- Led development on the full stack for a large human resource management web application reaching over 10,000 active users in a production environment.
- Developed a React Native mobile application for iOS and Android as well as the API backend.
- Developed an Electron application and automated deployment process for Windows and macOS.
- Interviewed, trained, and managed junior and intermediate developers.
- Reviewed peer's code on GitHub.
- Integrated with third party APIs (Azure Active Directory, Firebase, Indeed, Triton, Twilio).
- Developed reports from scratch, writing optimized SQL to gather real time data from large data sets, configuring Chartist to draw various types of charts, and generating spreadsheets with PHP.

Ajax, Bootstrap, CSS, Docker, Elastic Beanstalk, Electron, Git, GraphQL, JavaScript, jQuery, Localization, Mustache, MVC, MySQL, PHP, PHPUnit, React Native, Realm, Redux, Rekognition, S3, Sass, Yii

Game Developer (Remote)

May 2012 - Sep 2015

Wiggles Three-D, London ON

- Developed 2D and 3D games in Unity for iOS, Google Play, Amazon Appstore, Nook, Web, and Windows with C# and PHP with in-app purchases, achievements and high scores, advertising, cloud data storage, and analytics.
- Developed a 2D HTML5 Web Application in Canvas available for online syndication.
- Communicated with *Asmodee*, integrating with REST API and a strategic analytics implementation.
- Implemented a custom back end for A/B testing.

.NET, Ajax, C#, Canvas, CSS, Git, JavaScript, jQuery, Localization, MySQL, PHP, Unity, WordPress

Web Developer
